

Muhammad Amin Murtadho

Malang, Indonesia | [linkedin.com/in/muhammad-amin](https://www.linkedin.com/in/muhammad-amin) | <https://github.com/Ameer-28>

PROFILE

A Software Engineering graduate from SMK Telkom Malang specializing in back-end development. Experienced in building APIs and managing databases through various personal and academic projects. Committed to building a career as a Back-End Developer in a work environment that supports continuous learning.

EDUCATION

SMK Telkom Malang (2024 - 2027)

Software Engineering

- Learn programming languages such as Java, html, css, javascript, Node.js, Nest.js, Typescript, and Prisma ORM

PROJECT

E-commerce website development project

- Built a fullstack e-commerce app using Next.js and NestJS REST API.
- Architected a PostgreSQL database with Prisma ORM and JWT authentication with RBAC.
- Developed an interactive shopping cart, order management, and an Admin Dashboard with data visualization.

Court booking website development project

- Built a fullstack court booking app using Next.js, NestJS REST API, and Tailwind CSS.
- Architected a PostgreSQL database with Prisma ORM, JWT authentication (RBAC), and Google OAuth.
- Integrated Midtrans payment gateway, dynamic slot availability checking, promo codes, and an analytics Admin Dashboard.

Train ticket booking backend development project

- Developed a scalable backend REST API for a train ticketing system using NestJS and TypeScript.
- Architected a relational database with Prisma ORM and JWT authentication with RBAC for admins/passengers.
- Built scheduling logic, seat/carriage availability tracking, multi-passenger booking, and automated Swagger API documentation.

SKILL

- Languages & Frameworks: TypeScript, JavaScript, Node.js, NestJS
- Backend & Database: PostgreSQL, MySQL, Prisma ORM, REST API, Swagger, Passport JWT, Bcrypt
- Tools & DevOps: Docker, Git, Postman, Visual Studio Code

PROFIL

Lulusan Rekayasa Perangkat Lunak dari SMK Telkom Malang dengan spesialisasi pengembangan back-end. Berpengalaman dalam membangun API dan mengelola basis data melalui berbagai proyek pribadi maupun akademik. Berkomitmen untuk membangun karier sebagai Back-End Developer di lingkungan kerja yang mendukung pembelajaran berkelanjutan.

PENDIDIKAN

SMK Telkom Malang (2024 - 2027)

Rekayasa Perangkat Lunak

- Pelajari bahasa pemrograman seperti Java, HTML, CSS, JavaScript, Node.js, Nest.js, TypeScript, dan Prisma ORM.

PROYEK

Pengembangan situs web e-commerce

- Membangun aplikasi e-commerce fullstack menggunakan Next.js dan NestJS REST API.
- Merancang database PostgreSQL dengan Prisma ORM dan autentikasi JWT dengan RBAC.
- Mengembangkan keranjang belanja interaktif, manajemen pesanan, dan Admin Dashboard dengan visualisasi data.

Pengembangan situs web booking lapangan

- Membangun aplikasi booking lapangan fullstack menggunakan Next.js, NestJS REST API, dan Tailwind CSS.
- Merancang database PostgreSQL dengan Prisma ORM, autentikasi JWT (RBAC), dan Google OAuth.
- Mengintegrasikan payment gateway Midtrans, pengecekan ketersediaan slot secara dinamis, promo code, dan Admin Dashboard analitik.

Pengembangan backend booking tiket kereta

- Mengembangkan REST API backend yang scalable untuk sistem tiket kereta menggunakan NestJS dan TypeScript.
- Merancang database relasional dengan Prisma ORM dan autentikasi JWT dengan RBAC untuk admin/penumpang.
- Membangun logika penjadwalan, pelacakan ketersediaan kursi/gerbong, pemesanan multi-penumpang, dan dokumentasi Swagger API otomatis.

KEAHLIAN

- Bahasa & Framework: TypeScript, JavaScript, Node.js, NestJS
- Backend & Database: PostgreSQL, MySQL, Prisma ORM, REST API, Swagger, Passport JWT, Bcrypt
- Tools & DevOps: Docker, Git, Postman, Visual Studio Code

SERTIFIKASI

- Website development using Next.js & Nest.js
